Andhra Pradesh, India | kundu.brishtig@gmail.com | +91 9163270364 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience across cloud infrastructure, DevOps automation, and AI/LLM-powered application development. Proficient in Java and Python, with practical exposure to AWS, Docker, Kubernetes, Terraform, and CI/CD pipelines, alongside project work building and testing conversational AI features. Comfortable moving between infrastructure automation and applied AI development, with a foundation in data structures, algorithms, and system reliability.

TECHNICAL SKILLS

- **Languages:** Java, Python, C, JavaScript, HTML, CSS, SQL
- **Cloud & DevOps:** AWS (EC2, S3, IAM), Docker, Kubernetes, Terraform, Jenkins, GitHub Actions, CI/CD pipeline design, infrastructure automation, monitoring
- **AI / LLM Development:** LLM feature integration, conversational AI/chatbot design, prompt/response testing, intelligent task automation
- **Databases:** MySQL, Oracle SQL
- **Core CS:** Data Structures & Algorithms, cloud architecture, system reliability, software testing

EXPERIENCE

AWS & DevOps Trainee

May 2025 – Present

[Technical Hub Pvt Ltd]

- Completed hands-on training in AWS cloud services and core DevOps practices, including CI/CD pipeline setup and infrastructure automation.
- Deployed and managed applications using Docker, Kubernetes, and Terraform across cloud environments.
- Built and tested automation scripts to streamline build, deployment, and monitoring workflows.

PROJECTS

FoundIt — Cloud-Based Lost & Found Platform

Project Contributor

- Designed an AI-powered chatbot module supporting lost-and-found item matching and automated owner notifications.
- Applied cloud technology to connect user reports with intelligent matching and notification workflows.
- Built end-to-end matching logic that streamlined the reporting-to-recovery workflow for users.

AgentK — Intelligent Assistant

Project Contributor

- Designed assistant logic and integrated LLM-based features to answer user queries and automate tasks.
- Tested assistant responses and iterated on behaviors to improve accuracy and usefulness.
- Refined conversational flows to increase reliability of automated task handling.

DevOpsGPT Phoenix — AI-Powered Self-Healing System

Project Contributor

- Contributed to an AI-based DevOps system for infrastructure monitoring and automated recovery.
- Worked on AWS setup and automation implementation to reduce manual monitoring effort.
- Supported operational reliability through automated self-healing workflows for infrastructure faults.

EDUCATION

Aditya Engineering College

Aug 2023 – June 2027

Bachelor of Technology, Computer Science & Engineering — CGPA: 8.63 / 10.0

CERTIFICATIONS

- Red Hat for AWS Foundation — Red Hat
- AWS Foundation Certificate — AWS Academy
- AWS Certified Developer – Associate — AWS
- Google Cloud Practitioner — Google Cloud
